

A wide-angle photograph of a Napa Valley vineyard. The foreground shows rows of grapevines with green leaves, some showing small clusters of grapes. The vines are supported by wooden stakes and wires. The middle ground shows more rows of vines stretching towards a dirt road that leads into the distance. In the background, there are rolling hills, some trees, and a small cluster of buildings under a blue sky with scattered white clouds.

NAPA VALLEY WINE AND GRAPE INDUSTRY

2022 Economic Impact Report

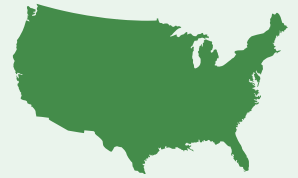

The wine industry continues to be a driver of the Napa County economy and has a significant impact on the California and US economies. Notably, Napa County is increasingly considered the U.S. West Coast hub for wine logistics (warehousing, bottling and wholesale shipping providers).
